OBJECTIVE

A tech enthusiast and passionate Frontend Developer skilled in JavaScript, React.js, and Next.js, now transitioning into Full-Stack Development. Looking for an Entry-Level role where I can apply my technical skills, learn new technologies, and grow as a developer. Excited to contribute to innovative projects in a collaborative environment.

PROFESSIONAL EXPERIENCE

Crafting Web Solutions Globally

2023 – present

Experienced web developer with a proven track record on Fiverr, delivering high-quality, customized solutions to clients worldwide, specializing in JavaScript, React.js, Next.js, HTML, CSS, Bootstrap.

EDUCATION

Bachelor's in Software Engineering (BSSE)

2021 – 2025

University of Central Punjab

Lahore, Pakistan

FSc Pre-Engineering

2019 – 2021

Punjab Group of Colleges

Pattoki, Pakistan

SKILLS

C++ | JavaScript | React.js | Next.js | Firebase | Flutter | Problem Solving

PROJECTS

WeAR Galaxy: Fashion Reimagined with AR Magic

Final Year Project

Developed an innovative mobile application in flutter that enhances the eyewear shopping experience using Augmented Reality (AR) and Artificial Intelligence (AI). The app enables real-time virtual try-ons and provides AI-powered personalized frame recommendations based on facial analysis.

Weather App

Developed a Weather App using HTML, CSS and JavaScript. In this, we will display the weather info on website from Free API using JavaScript.

Mafia-Themed Landing Page

I developed a Mafia-themed landing page for a Fiverr client, focusing on a visually engaging and responsive design. The page features dynamic UI elements and a clean layout, ensuring a smooth user experience across all devices.

Todo App

Developed a simple and user-friendly Todo app using React and Context API, where users can add, edit, delete, and mark tasks as completed. The app automatically saves tasks using local storage, so nothing gets lost on a refresh. With a clean and responsive design, it makes managing daily tasks easy.

Netflix-Clone App

Build a Netflix Clone website using React.js, Firebase for Authentication, and the TMDB API to display movie details. Users can sign up, log in, and explore movies. The app is fully responsive, providing a seamless user experience across devices.
